- 🚫 Your figure will break if you pull him too far.
- 🚫 Excessive stretching could result in damage to the toy.
- 🚫 **FORGET THE COLD OR THE HEAT!** Your figure doesn't like extreme cold or hot conditions. Keep him at room temperature and he'll be alright. Outside is okay, if the temperature is about 22 C (72 F) or above.
- 🚫 When your figure is cold, he is more difficult to stretch. As you hold him and stretch him carefully, he "warms up," and will be easier to stretch. Alternatively, you can put him in a bowl of warm water to soften up.
- 🚫 Do not pull your figure too far, stretching him too far can break your toy. **DO NOT OVER STRETCH!**
