

# SPOTBOTS™

## CYBERNETIC SECURITY ROBOTS

# SPOTBOT™

## SUPER BRIGHT TRACKING LIGHT

Item # 68401 Ages 6+  
Requires: 3 AAA (1.5V) batteries (not included).

**1** Have an adult open the battery door on the back of Spotbot with a Phillips head screwdriver (not included) and insert 3 "AAA" batteries (not included). Then replace the battery door and securely fasten with screw.

**2** Place Spotbot on a smooth indoor surface such as a wood, tile, or vinyl floor. (Spotbot will not drive properly on high carpet, but his sensors will all still work)

**3** Power up Spotbot by sliding the power button on his back to the ON position. Spotbot will emit sound for 10 seconds. (During this 10-second waiting period, there should be no movement in front of Spotbot, otherwise he will not respond)

**4** Spotbot is now in GUARD MODE! If anything or anyone crosses his path, his super bright searchlight turns on to look for the intruder. His screeching alarm will alert you and he will chase them down!

**5** When Spotbot stops moving, he will emit a sound for 3 seconds and automatically reset. (During this 3-second waiting period, there should be no movement in front of Spotbot, otherwise he will not respond) If you want to rearm him, slide the power button to OFF (then follow directions from step 2). To preserve battery life, when Spotbot is off-duty, slide the button on his back to the OFF position.
